ABOUT ALUMNI CLASSROOM FURNITURE

WE HAVE AN OBLIGATION TO BE THE TEACHERS ASSISTANT, THE ARCHITECTS INSPIRATION, AND TO SUPPORT STUDENTS IN THEIR LEARNING ENVIRONMENTS.

OUR PRIMARY GOAL IS TO INSPIRE CREATIVE THOUGHT AND CREATE INNOVATIVE CLASSROOM ENVIRONMENTS THAT ALLOW ADAPTABILITY TO THE EVER CHANGING WAYS OF LEARNING AND GIVE STUDENTS THE OPPORTUNITY TO EXCEL.

MISSION AND VISION

Our mission is to create classroom environments that allow the best learning opportunities possible, that will allow all students to engage in their educational process, and that will leave no child behind. Our Vision is to see all students have equal opportunity to be educated in the most up to date classroom environment.

The best way to assist the teacher is to design flexibility into the classroom. Education is moving at lightning speed and the ability to adapt learning environments at the same pace is critical to allow educators to leave no child behind.

We want to see that each student is given the opportunity to advance and take advantage of the newest teaching methods.

All our products are designed, engineered, and manufactured to strict standards for quality, that are inspected numerous times during the manufacturing process, including a final inspection prior to packaging for shipment.

We look forward to making your classroom furniture purchase an enjoyable experience.

GreenGuard Certified

[Logo]
Collaborative learning encourages active participation in the classroom. Working in smaller groups leads to discussion that develops a greater understanding of the subject matter among all participants.

The foundation for the implementation of a productive 21st Century collaborative environment begins with the ability to position students in the most effective collaborative groupings. Correct furniture configurations are imperative to a successful launch. Studies show the most effective group sizing is \textbf{FIVE}. In a group of five, eye contact through cross directional positioning plays a major role in how all participants will participate and interact with each other.

Just as important are the participants in the group. Each group requires a teacher selected mix of over achievers, middle achievers and under achievers. These diverse groupings will ensure that there is engagement and participation in the conversation that leads to a greater understanding of the subject matter. With the suitable environment in place, the teacher becomes the “conductor of the orchestra” if you will. The teacher will continually steer the comprehension of the subject matter onto its correct course. Without a collaborative environment, it is important to remember that a 50 minute class with 30 students would only allow for just over one minute to be spent with each student, and that does not take into consideration any of the time spent teaching the lesson.

The Goal: Greater understanding – Higher achievement – Significantly better results.

\textbf{So y5?}

Studies show that groups of five are the most effective grouping number for collaborative learning.

If you measure the number of possible social interactions with varying groups, the optimal group size appears to be Five (5). The number of social interactions begins to explode in groups with more than 5 people.

– Sheila L. Margolis, PhD President
\textit{WORKPLACE CULTURE INSTITUTE}

Researchers report that, regardless of the subject matter, students working in small groups tend to learn more of what is taught and retain it longer than when the same content is presented in other instructional formats.

– Barbara Gross Davis
\textit{TOOLS FOR TEACHING - STANFORD UNIVERSITY}

Misperception: Bigger is better. Actually: Excessive size is one of the most common - and also one of the worst - impediments to effective collaboration.

– J. Richard Hackman
\textit{HARVARD BUSINESS REVIEW}
Collaborative groups can gain effectiveness simply through the proper arrangement of sitting positions. Studies demonstrate that very positive results can be achieved by choosing the correct seating arrangement for a specified collaborative activity.

In the K-12 learning space, our goal is to empower all group members allowing them to have equal influence in the group. The seating positions of this group will be the primary factor that will naturally encourage more ideas and discussion through a level of increased interaction. The difference between “Traditional Rectangular Groups” and “Round or Pentagonal Groups.”

**Traditional or Standard Rectangular Groups**

In the traditional or standard rectangular seating arrangement of four, there is a mood or competition or confrontation that is present. In this configuration there is often pairing off based on the seating position of sitting on opposite sides. Traditionally, this is the position that negotiators would prefer to be in and is recognized as a “Face Off” position.

When you add one more participant on each side of the group, (equaling six participants in total). In this instance an additional two problems are created that are not conducive to a K-12 Collaboration. The first is a lack of visual contact with every group member and the second is the middle person in each row of three will typically end up taking on a dominate role of being a mediator or group leader.

**Progressive Round or Pentagon Groups**

This type of seating arrangement is not new but it can provide considerable insight into the way that human interactive exchanges can be altered when compared to the traditional style. The most famous example of this was with King Arthur and the Knights of the Round Table. Every Knight that sat around the table was considered to be an equal to his peers and there was no central power position.

Visual contact is every inclusive and because of that, there is no dominate role in the group that has been created through a seating position. The ability to visually see all of the group members is vitally important for the group. This promotes the ability to interact and share ideas better. The result is to gain a better understanding of the subject matter as a whole.

Through visual contact you are able to judge a person’s Body Language. Body language is displayed in four different yet important ways:

1. Head Movement
2. Facial expressions
3. Body Posture
4. Hand and Finger Gestures

Simply by having visual contact with all group members you are able to make a quick determination about the participation level of all members:

- Are all group members paying attention?
- Are all group members participating?
- Is there a sense of agreement or disagreement among the participants?
- Is anyone choosing not to participate?

This arrangement creates a more cooperative situation for discussion and a sense of equality instead of hierarchy.

A study from the University of Montana indicates that the “Round or Pentagon Groups” create a Web network type of communication. The word “Web” is to indicate cross directional method of communication. This is a more open method of communication in which members are encouraged to communicate directly with each other. Information is relayed more rapidly and each member feels they have greater influence in the group. The Alumni y5 collaborative groupings are designed around the knowledge that we have gained through these recognized studies about the very best implementation of collaboration. The Alumni y5 practices implement this knowledge in the most effective manner creating the foot print for the most successful out comes in the roll out and implementation of 21st Century collaborative learning.

Alumni strongly believes in following the path of research and proven concepts when developing furniture solutions. Our goal is to create the absolute best opportunity for all students to succeed with their education.
21st Century Classroom Solutions
The foundation for the implementation of a productive 21st Century collaborative learning environment begins with the ability to position students in the most effective collaborative groupings. Studies show that the most effective group size is **FIVE**. Supportive research has been pivotal in the design and development of the Flow Desk. The Flow is a classroom solution that is appropriate for both traditional and progressive teaching styles. The unique shape and size of the Flow takes into consideration classroom size. The Flow is a desking solution that allows for multiple, functional group configurations while providing the option of individual testing or independent study.

![Flow Desk Image]
21ST CENTURY CLASSROOM SOLUTIONS
PENTE & IDEA DESK

The Pente and Idea are new additions to the y5 family. Much like the Flow Desk, these unique shapes and designs take into consideration the need for furniture that is both functional and a practical solution for 21st Century learning. In their ideal groupings of FIVE, they maintain a pentagon design that supports a web network type of communication, allowing for a cross directional dialogue to occur during collaboration.
21ST CENTURY CLASSROOM SOLUTIONS
BOOMERANG DESK

The Alumni Boomerang is a modern twist on a traditional desk grouping of 4. The Alumni Boomerang fits snugly together with no wasted space in the center. Each student sits on a different side opening lines of communication between all 4 students.
21ST CENTURY CLASSROOM SOLUTIONS
HEX DESK

Students are able to sit in a circular configuration of 6 for group activities and learning*. The Alumni Hex Desk can also be arranged in configurations allowing increased teacher interaction in group learning.

SEE PAGE 86

*or traditional rows
Alumni Interactive Tables are contemporary, versatile, and practical as a two-student desk or activity table. They can be arranged for both partnered and collaborative learning. Three tables fit together to accommodate 6 students in its ideal configuration*. Interactive Tables can also be utilized with rectangular activity tables for larger collaborative possibilities.

Also available in 35” x 50” size at café height.

*Creating a large work surface which is great for group activities.
Contemporary, versatile and practical solutions for the cafeteria, learning commons, and higher education.

21ST CENTURY CLASSROOM SOLUTIONS
CAFÉ HEIGHT TABLES AND STOOLS

Standing desks are well known to help improve mood and energy levels as well as increase productivity. With the flip of a lever, the Alumni Sit-Stand Desk pneumatically adjusts from sit to stand 26-43”. Endless position changes throughout the day make this desk an energetic addition to any learning environment. Two casters and two stabilizing glides make this desk easy to move about the classroom and set in place.

Available with a 20” x 27” Collaborative Top in hard plastic with an embossed pencil groove.
ALUMNI SEATING
Developed for use in any learning environment. This stacking chair is maintenance friendly and easy to clean. Specifically designed with a smooth back patented flat ribbing support system through the center of the seat back, referred to as the "Power Rib".

FLOW-DISK

THE MOST DYNAMIC GROUP SIZING FOR 21ST CENTURY COLLABORATIVE LEARNING.

FLOW DESK

The ideal group size for collaborative learning! For traditional and progressive teaching styles. The Alumni Flow desk was developed as a tool for students and teachers to implement common core learning concepts. It can be arranged in collaborative groups or traditional rows. In its ideal group configuration of 5, the Flow desk was designed to maximize the use of limited space commonly observed in todays classrooms. Optional casters make this desk mobile and easy to move into multiple configurations. These desks can then be pulled apart for individual study or testing purposes. Full-frame construction takes the wiggle out of learning.

TOP

Hard plastic top or HPL with PVC Edge

FRAME

All welded table frame and leg assembly consisting of full perimeter 3/4" steel tubing welded to four (4) leg mounts (1 1/2") that are designed to accept a 1 1/8" O.D. round steel upper tube with inner round telescoping tube. Adjustable height 22"-30"

FINISH

100% polyester premium powder coat

GLIDES

STANDARD: Marquis nylon swivel
OPTIONAL: Marquis neoprene swivel, Marquis steel swivel

BOOMERANG DESK

The Alumni Boomerang desk was developed as a tool for students and teachers to implement common core learning concepts. It can be arranged in collaborative groups or traditional rows. Students can sit at the Boomerang desk front-facing, or left or right handed tablet style. Tablet style arrangement allows for space-saving rows in the classroom. In its ideal group configuration of 4, these desks fit together snugly with no wasted space in the center. Optional caster(s) make this desk mobile and easy to move into multiple configurations. These desks can then be pulled apart for either individual study or testing purposes. Full-frame construction takes the wiggle out of learning.

SIT STAND DESK
INNOVATIVE PNEUMATIC ADJUSTMENT

SIT-STAND
Standing desks are well known to help improve mood and energy levels as well as increase productivity. With the flip of a lever, the Alumni Sit-Stand Desk pneumatically adjusts from sit to stand (26-43”). Endless position changes throughout the day make this desk an energetic addition to any learning environment. Two casters and two stabilizing glides make this desk easy to move around the classroom and set in place.

BREEZE SINGLE DESK

OGEE is defined as having a double continuous S-shaped curve. The Alumni Ogee Breeze Desk offers an interactive and creative table solution for any learning environment. The unique curve design allows for endless configuration possibilities.
In order to create an inclusive, experiential learning environment our school furniture must reflect our thinking. The right school furniture in the right environment can change the educational experience of the students. It’s well worth it!

Dawn Wemigwans, St. David School Principal

Alumni Furniture is an innovative company that is steering schools and classrooms into the modern era of collaborative learning with their distinctive furniture options. The Flow desk, in particular, has a sleek contemporary design that allows for unique and creative collaboration configurations. Alumni is creating a new way for classrooms & schools to look and function.

Tara Large, Procurement Coordinator
In 2011, we introduced collaborative learning into our schools by implementing collaborative furniture not only in our classrooms but in all of our learning spaces. This direction continues to be a success in our schools.

Karen Latrelle
Manager of Purchasing and Administrative Services

T-LEG INTEGRITY LIFT LID

Contemporary oval tubing style legs. The Alumni Integrity lift lid desk features an exclusive no pinch front design that protects fingers from being pinched when the lid is closed. It’s 5 1/2” deep book box allows for better book storage. Designed to open wide, that makes it that much easier to find those items at the back of the desk. The lift lid desk includes a unique angled pencil tray for quick access to pens and pencils without opening the lid.

**TOP**
- Hard plastic with embossed pencil groove or 1 1/8“ HPL top with round corner PVC edge

**FRAME**
- All welded frame and legs consist of two 2” x 1 1/4”, upright oval steel tubes. Fully adjustable painted T-leg insert tubes welded to a contemporary style base. Adjustable height 22-30”

**FINISH**
- 100% polyester premium powder coat

**GLIDES**
- ABS plastic scuff resistant foot guard

**AVAILABLE OPTIONS**
- Fixed height

## CAFÉ HEIGHT INTERACTIVE

Alumni Interactive tables are contemporary, versatile, and practical as café height activity table. They can be arranged for both partnered and collaborative learning. The large work surface makes this table great for group activities. Three tables can be fit together to accommodate 6 students in its ideal configuration. Ideal for use with Café height stools.

The Alumni Convertible Bench Table is a safe and flexible solution for cafeterias and auditoriums. Heavy duty magnets secure tables together for cafeteria style seating without the use of hooks or connectors. They easily convert from a cafeteria table to auditorium bench in one easy motion. Folds and nests for convenient storage.

**TOP/SEAT**  
HPL with Armor edge. The premium armor edge eliminates seams which can accumulate dirt, bacteria and moisture.

**FRAME**  
All welded table frame and legs consists of two 2x1 1/4", 13 gauge oval tubes. Base tube is 2x1 1/4", 13 gauge oval tubes. Remaining framing components are fully welded 1 1/4" O.D. 14 gauge.

**FINISH**  
100% polyester premium powder coat.

**GLIDES**  
4" Heavy Duty Casters and Boot glides.

**NOTE**  
Standard frame color is a hammertone powder coat.

Folding Tables

Alumni Lite folding tables are made of ABS plastic and are impact resistant. Built to withstand up to 2,000 lbs. of equally distributed weight. Rigid core material with heavy gauge steel frame. Injection molded ABS corners are designed to absorb a 12 inch height drop without causing structural damage. Replaceable rubber stacking bumpers keep tables from sliding and protect table surface when stacked.

**Top**
ABS impact resistant plastic, sonically welded

**Frame**
1” round, tubing with brackets fastened directly to the top providing maximum holding power allowing the screws to securely stay in place without stripping. Fixed Height 30”

**Finish**
100% polyester premium powder coat

**Glides**
Skid resistant over fitted glide

STACKING
Alumni Stacking tables are a space saving solution. These heavy gauge, fully welded tables stack neatly and compactly. Effortless stacking design allows for tables to slide onto one another without lifting up and over. Four leveling bumpers on the underside of each table prevent scratching and scuffing when stacking.

**TOP**  | HPL with square corner PVC edge
--- | ---
**FRAME**  | Welded table frame and legs consists of four 1 1/8" tube, Fixed height 30"
**FINISH**  | Chrome
**GLIDES**  | Standard insert glides
**AVAILABLE OPTIONS**  | 100% polyester premium powder coat finish.

ALUMNI CLASSROOM FURNITURE INC. warrants all steel fabricated components of its frames to be free from defect in materials and workmanship under normal use, service and handling for a period of fifteen (15) years. This warranty does not cover misuse or abuse of the product.

ALUMNI CLASSROOM FURNITURE INC. reserves the right to inspect the product in question to assess the cause of damage.

Contact your sales representative for complete warranty details.
As a responsible member of the business community, it is our ambition to work towards eliminating the impact that manufacturing has on the environment. Our efforts drive us towards sustainability. We are committed to leaving the environment better than we found it.

**REDUCE, REUSE, RECYCLE.**

Alumni applies a concentrated effort to the three R's within our production, packaging and shipment process. The result of our motivation is having a cleaner environment that produces less waste and uses as many recyclable materials as possible. The policy of Reduce, Reuse and Recycle is so important to us that even this catalogue is printed on recycled paper.

Alumni has implemented a Safe Materials Testing Program (SMTP) to ensure that all materials that are used meet or exceed Federal Regulation. Our products are tested to meet ASTM, NEMA, and Fed Spec Standards. Alumni uses Internationally Renowned Testing Labs to ensure products safety and quality.

We want our children to grow up in a healthy environment so that their children can too.

Alumni Classroom Furniture is compliant with the testing requirements in the Consumer Product Safety Improvement Act 2008.
